Data Science Student at RWTH Aachen and Computer Engineering graduate professional. Skilled in Full-stack development (.NET, Python) and Machine Learning integration (LangGraph, RAG). Experienced in building ERP systems, managing Azure Cloud architectures (CI/CD), and applying analytical thinking to complex software solutions. Focused on developing scalable, data-driven applications in Agile environments.

Technical Skills

- **Languages:** Python, .NET, Java, SQL, JavaScript, Swift
- **Frameworks/Tools:** React Native, Restful APIs, Scrapy, LangGraph, RAG
- **Cloud & DevOps:** Microsoft Azure Cloud (CI/CD, VNets), Docker, Git
- **Data Science:** Machine Learning, Data Scraping (MongoDB), Statistical Modelling
- **Networking:** TCP/IP, Cisco Packet Tracer, DNS, DHCP, Subnetting

Education

- **M.Sc. in Data Science** | RWTH Aachen University, Germany | *In Progress*
- **B.Sc. in Computer Engineering** | Dokuz Eylul University, Turkey | *Graduation: July 2025*

Professional Experience

- **Innovile** - Software Engineer Intern

Engineered end-to-end functional web applications for ERP systems using .NET Core. Managed project workflows and task tracking via Jira.

- **PIA** - Software Engineer Intern

Developed full-stack applications using Java Spring Boot and MongoDB in an Agile team environment.

- **Ceomed** - Software Engineer Intern

Designed and implemented ERP modules using React, JavaScript, and Oracle Apex.

Projects

- **Smart PPE Compliance System (Senior project):** Developed an AI-integrated mobile application using React Native, LangGraph, and Deep Seek LLM for real-time safety monitoring. Implemented RAG workflows and YOLOv5 models to deliver intelligent, automated compliance reporting and data-driven insights.
- **Diabetic Probability Calculator:** Built a Python-based diagnostic tool using real-world health data and algorithmic analysis.
- **Azure Cloud Engineering:** Successfully deployed web apps and managed virtual machines/pipelines via Microsoft Azure Bootcamp.
- **Cisco Network Simulation Project:** Designed a Metropolitan Area Network (MAN) using Cisco Packet Tracer. Configured routing protocols, switching, and IP addressing schemes to establish a robust data communication infrastructure.

Certifications & Soft Skills

- **Certifications:** IELTS Certified (English Proficiency), Microsoft Azure Cloud Engineering.
- **Soft Skills:** Analytical Thinking (McKinsey Forward Program), Problem Solving, Agile Teamwork.
